

Underground Injection Control Data Flow Progress

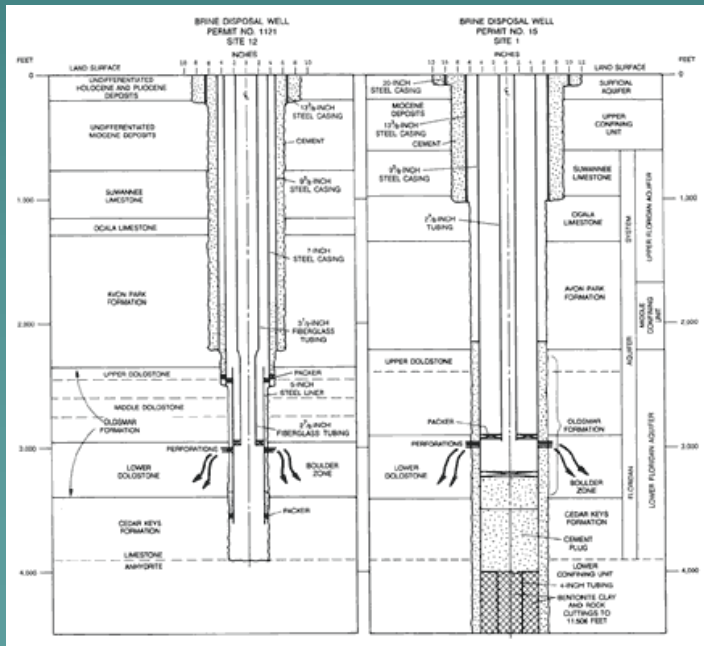

John Hall, UIC Coordinator
New Mexico Environment
Department

(505) 827-1049
John.hall@state.nm.us

A stylized, dark teal silhouette of a mountain range is located in the bottom right corner of the slide, extending from the right edge towards the center.

UIC Program in New Mexico

- ◆ Split between the Oil Conservation Division of Energy, Minerals, and Natural Resources Dept. and the Ground Water Quality Bureau of the Environment Dept.

Pollution Prevention Section of the Ground Water Quality Bureau

- ◆ Regulates UIC and Non-UIC discharges that could impact ground water quality

Current Data Management System

- ◆ IDEA database
 - ◆ UIC spreadsheet
 - ◆ Monitoring spreadsheets
 - ◆ Paper files
- 
- A stylized, dark teal silhouette of a mountain range is positioned in the bottom right corner of the slide, adding a decorative element to the background.

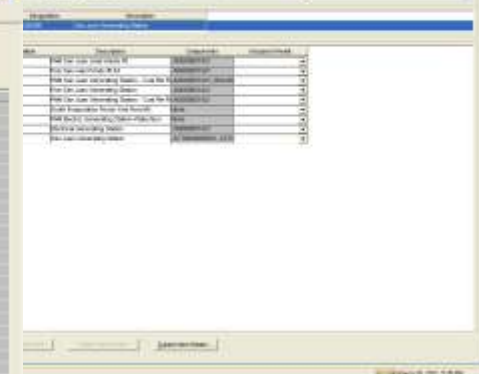

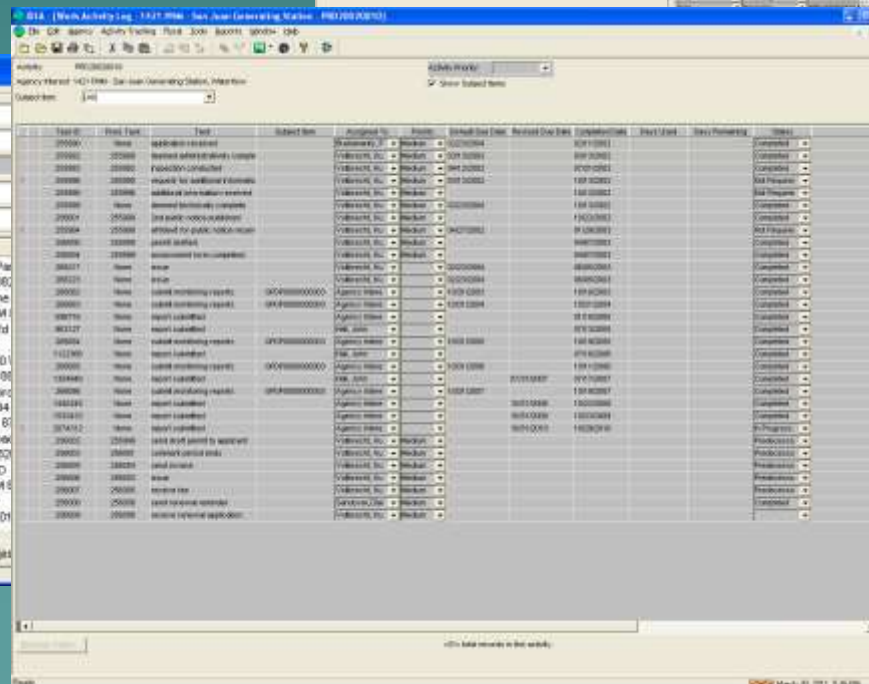

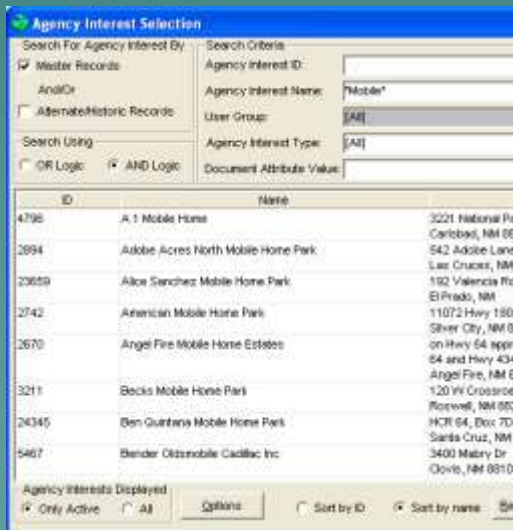

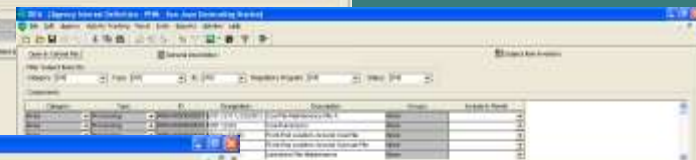

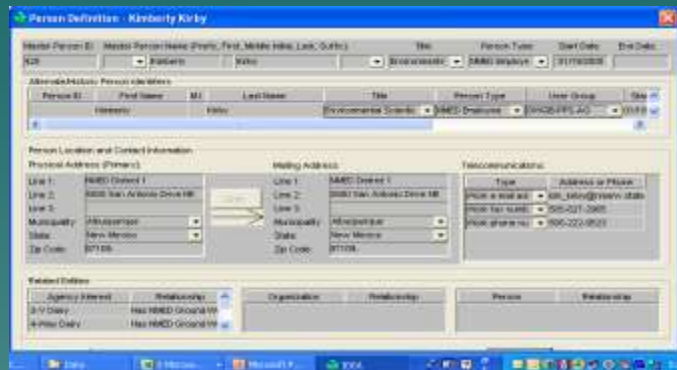

Monitoring Spreadsheet

Integration of UIC and Non-UIC Data

- ◆ Eliminates monitoring spreadsheets
 - ◆ Eliminates similar (but more complex) data entry processes (e.g., inspections and compliance/enforcement) in IDEA for non-UIC facilities/sources
 - ◆ Simplifies reporting (e.g., legislature) of combined UIC and non-UIC facilities
- 
- A stylized, dark teal silhouette of a mountain range is positioned in the bottom right corner of the slide, partially overlapping the bottom edge of the text area.

Program/IT Cooperation

- ◆ Grant is provided to IT, but UIC program remains the customer (product must work for Program)
 - “Required Data” (R1) is not all that is required for PAMS and 7520 summary reporting
 - Must integrate UIC and non-UIC data that overlap for programs that have both
 - Not cost-free to UIC program--staff resources
 - IT may have to motivate program

Data QA/QC process

- ◆ Developer does physical mapping and follows business rules and data definitions
 - ◆ UIC staff tests developed product by entering data in accordance with, and in violation of, business rules and data definitions
 - ◆ UIC staff and developer adjust/tweak data to be migrated from spreadsheets and linked from TEMPO
 - ◆ Some data may be tweaked in conversion from staging database to XML
 - ◆ Get other Program staff to test the database to ensure that it meet their needs
 - ◆ Submit data to EPA validation process
-
